

EXERCISES*

Track: FHIR for specifiers
Tutorial: Profiling Academy – Profiling Guidelines
Speaker: Lilian Minne

The speaker will be in the hands-on area to answer your questions!

During the hands-on session of the Profiling Academy tutorial we will explore the online Profiling Academy, which is available at: <https://simplifier.net/ui/ig/ProfilingAcademy/ProfilingAcademy>
We will work on the exercises of the modules: Start Profiling, Slicing, Extensions and Best-Practices.

Depending on your level of expertise you may choose to fully read each module or skip directly to the exercise of the module. In the exercises we will use our Profiling tool Forge, which can be downloaded here: <https://simplifier.net/forge/download>

1. Start Profiling

In the exercise of this module you are asked to build a basic profile. Follow the instructions given in the module: <https://simplifier.net/ui/ig/ProfilingAcademy/Startprofiling#Exercise>

2. Extensions

In the exercise of this module you will add simple and complex extensions to your profile. Follow the instructions given in the module: <https://simplifier.net/ui/ig/ProfilingAcademy/Extensions#Exercise5>

3. Slicing

In the exercise of this module you will add basic slices to your profile. Follow the instructions given in the module: <https://simplifier.net/ui/ig/ProfilingAcademy/Slicing#Exercise4>

4. Best-practices

In the exercise of this module you are asked to build a couple of profiles and extensions based on the best-practices you learned in this module. Follow the instructions given in the module: <https://simplifier.net/ui/ig/ProfilingAcademy/Best-practices#Exercise3>

Have fun, and remember to ask for help if you get stuck!

*This exercise will not be evaluated and no prizes are attached to any result. The exercise can only be used at HL7 FHIR DevDays 2017.
