Exercise

Vonk Plugins

Track lead: Christiaan Knaap

During the Let's Build! Session, you will learn to build a Plugin for Vonk

After completing this tutorial, you will be able to:

- Configure Vonk to run a plugin
- Build a plugin for Vonk yourself

Create a response counter Plugin

Requirements

- Visual Studio
- .NET Core 2.2
- Vonk FHIR Server + evaluation license
- Clone Vonk.Plugins.ExampleOperation

The tutorial and code for this exercise can be found at:

<http://bit.ly/VonkSessionsAMS2019>

Have fun and remember to ask for help if you get stuck!
